## Table of Contents

## IMPORTANT - Please Read and Follow

- Make sure that incoming voltage is the same as unit rating. An electric rating plate specifying voltage, frequency, wattage, amperage, and phase is attached to the product.
- To reduce the risk of fire, electrical shock, or injury to persons, installation work and electrical wiring must be done by a qualified technician in accordance with all applicable codes and standards, including fire-rated construction. The installer should leave these instructions with the consumer who should retain them for loca inspector's use and for future reference.
t is your responsibility to:
- Comply with installation specifications and dimensions
- Properly install unit
- Remove any moldings or decorative panels that prevent the unit from being serviced.
- Make sure that you have these materials (not
provided with your unit), which are necessary for proper installation:
- $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ copper tubing with shutoff valve - 6 - \#8 x $3^{\prime \prime}(7.6 \mathrm{~cm}$ ) wood screws (longer

1- Saddle valve (DO NOT use self-piercing feature of the valve)

- Assure that floor will support unit, door panels and contents (approximately 1200 pounds [ 540 kg ].
- Provide a properly grounded electrical outlet
- Assure that location will permit appliance doors to open a minimum of $90^{\circ}$ Yery important.
We have provided many important safety messages in this manual and on your appliance. ALWAY
safety messages.
This is the safety alert symbol. This symbol alerts you to hazards tha can kill or hurt you and others.
All safety messages will be preceded by the safety alert symbol and the word "DANGER" or "WARNING,"

## A DANGER

Hazards or unsafe practices which WILL result in severe personal injury or death

## ! WARNING

 Hazards or unsafe practices which COULD result in severe personal injury or deathAll safety messages will identify the hazard, tell you how to reduce the chance of injury, and tell you what can happen the instructions are not followed

## IMPORTANT-Please Read and Follow!

A GFI shall be used if required by NFPA-70 (National Electric Code), federal/state/local laws, or local ordinances.

- The required use of a GFI is normally related to the location of a receptacle with respect to any significant sources of water or moisture
- Viking Range Corporation will NOT warranty any problems resulting from GFI outlets which are not installed properly or do not meet the requirements below.

## If the use of a GFI is required, it should be:

- Of the receptacle type (breaker type or portable type NOT recommended)
- Used with permanent wiring only (temporary or portable wiring NOT recommended)
- On a dedicated circuit (no other receptacles, switches or loads in the circuit)
- Connected to a standard breaker of appropriate size (GFI breaker of the same size NOT recommended)
- Rated for Class A (5 mA +/- 1 mA trip current) as per UL 943 standard)
- Protected from misture from any loose-fitting gaskets (if applicable in outdoor situ

## 4 WARNING

TIP OVER HAZARD
Appliance is top heavy and tips easily when not completely installed. Keep doors closed until appliance completely installed and secured per installation instructions.

## 4 WARNINC

 ELECTRICAL SHOCK HAZARDDisconnect power or turn OFF power disconnect switch to OFF position before removing top grille Failure to do

Use two or more people to move and install appliance. Failure to do so can result in death or serious injury.

Most of the unit's weight is at the top. Extra care is needed when moving the unit to prevent tipping. Use cardboard shipping material or plywood under unit until it is installed in the operating position to protect floor surface.

## Dimensions (Botom-Mount)

## Specifications (Botom-Mount)

| 36" Bottom-Mount |  |  |
| :---: | :---: | :---: |
| Description | FDBB5361 |  |
| Overall width | $36^{\prime \prime}(91.5 \mathrm{~cm})$ |  |
| Overall height (from bottom) | $82-3 / 4^{\prime \prime}(210.2 \mathrm{~cm})$ min. to $84-1 / 16^{\prime \prime}(213.5 \mathrm{~cm})$ max. |  |
| Overall depth (from rear) | To front edge of side trim: $23-13 / 16^{\prime \prime}(60.5 \mathrm{~cm})$ To front of top grille: 24-3/4" (62.9 cm ) |  |
| Cutout width | $36^{\prime \prime}(91.5 \mathrm{~cm})$ |  |
| Cutout height | 82-7/8" (210.5 cm) min. to 84-1/16" ( 213.5 cm ) max. |  |

## Cabinet Information

Custom panel models, (with $3 / 4^{\prime \prime}[1.9 \mathrm{~cm}]$, thick panels and custom handles locally supplied)
fit flush in $25^{\prime \prime}(63.5 \mathrm{~cm}$ ) deep (countertop depth) cabinet openings with no protrusion into
room except custom handles

## Cabinet Information

Custom panel models can be installed in standard $24^{\prime \prime}(61.0 \mathrm{~cm})$ deep openings. However, the door faces and top ventilation grille will protrude $3 / 4^{\prime \prime}(1.9 \mathrm{~cm})$ into the room. This is ideal for alignment with full overlay cabinet doors.

## Custom Side Panel Dimensions

## Custom Panel General Information

Custom finishing options

- All installations must allow for the refrigerator
and freezer door to open a minimum of 90
- For side wall or corner installation, allow for a
standard $3^{\prime \prime}(7.6 \mathrm{~cm})$ cabinet filler to assure
door(s) opens $90^{\circ}$.
- Panel thickness must not exceed $1^{\prime \prime}(2.5 \mathrm{~cm})$ on hinge side. Thicker panels will interfere with door swing and clearance
Door panels should be installed after the
refrigerator has been plugged in for at least 24 hours.

Note: If a custom handle is used, a wider filler may be necessary.

Ice and Water Dispenser Bezel Removal (if required)

Remove packaging material surrounding bezel.

Remove spill tray from lower part

Grasping the sliding lever, pull away from bezel.

Store bezel and spill tray in safe and secure place until installation.

Remove bracket
Measure and mark the first hole for each bracket.

Push custom wood panel onto door

Custom Door Panel Installation (Refrigerator or Freezer cont.)

Slide custom wood panel to the hinge side, ensuring
"Z" bracket engages the door bracket.

Reinstall handle side door trim

Custom Freezer Door Panel Installation (Bottom-Mount Only cont.)

Open freezer door. Remove door trim screws and door trim with a phillips screwdriver.

Measure and mark the first hole on each side of the bracket.

Align and slide custom wood panel onto door.

Remove bracket.

Attach bracket to the custom panel.

Reinstall door trim and door trim screws.

Install custom wood panels per product's
installation instructions.

Push firmly into cavity until lower screw hol

Position upper mounting support over holes
underneath top section of beze

Locate opening in door and position bezel. Note: Graphics on bezel will be on top end, tilt slightly
forward to allow water tube clearance.
 nstall two screws in lower part of bez
but DO NOT tighten all the way.

For a left hinge door, cut $5 / 8^{\prime \prime} \times 2-3 / 4^{\prime \prime}$ in lower left corner.
Note: Steps show panel upside down and notched for left Note: Steps show panel upside down and notched for left
hinge application. Mirror dimensions for right hinge door.

Adjust and reposition bezel

Align cube switch with sliding lever and firmly push
Install Door Trim Insert

Use the roll of trim insert located in the drawer inside
the unit to apply to the door trim.

Replace spill tray in lower part of bezel

Bottom-Mount Custom Panel Hinge Cutout (if required)

For a left hinge door, cut 5/8" $\times 3^{\prime \prime}$ in lower left corner. Note: Steps show panel upside down and notched for
left hinge application. Mirror dimensions for right hinge

Cut out diagonal in lower left corner.
Custom Grille Installation

Remove air grille center blade.

Measure and cut 2-1/16" diagonal in
lower left corner.

Final view of lower corner.

Remove two $1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$ screws with a magnetic

Custom Grille Installation (cont.)

Pull air grille assembly forward.
(5)

Using eight screws removed from the mounting brackets, attach mounting brackets to the custom wood grille using
predrilled pilot holes. (See grille overlay specifications for proper alignment and pilot hole placement.)

Install two $1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$ screws with a magnetic extended screwdriver at least $8^{\prime \prime}(20.3 \mathrm{~cm})$ long.

Remove 2 mounting brackets from the grille air assembly.

Insert custom air grille assembly.

Install custom air grille center blade.

## General Information

## Area Requirements

Verify the following:
Unit can fit into residence and can be moved
around corners and through doorways.

- Floors can support unit's weight plus food weight (approximately 1200 pounds [ 540 kg ] per unit)
- Floors underneath refrigerator are level with surrounding finished floor.
- Rear wall is solid and is able to support two horizontally mounted $2 \times 4$ s (included) bolted to two wall studs. The $2 \times 4$ board bolt heads must be flush with $2 \times 4$ to prevent obstruction.
- Remove anything attached to rear or side walls that can obstruct unit installation.
- Cutout dimensions are accurate.
- Electrical outlet is in correct location
- Water line is in correct location
- DO NOT install a refrigeration unit near a heat source, nor in a location where the surrounding temperature will fall below $60^{\circ} \mathrm{F}\left(16^{\circ} \mathrm{C}\right)$.

## Electrical Requirements

It is the customer's responsibility to.

- Contact a qualified electrical installer
- Assure that the electrical installation is
adequate and in conformance with the National Electrical Code, ANSI/NFPA 70-latest edition 22.2 No M91 (a latest edition), $n d$ all 22 Noll codes and ordinances.

A 115 volt, 60-Hz, 15 amp , fused, electrical supply is required. It is required that a separate dircuit serving only this appliance be provided. This appliance is equipped with a power supply cord having a 3 -prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3-prong, grounding-type wall receptacle.
O NOT use an extension cord.
If codes permit a separate grounding wire to be used, it is recommended that a qualified electrician determine that the grounding path is adequate.

DO NOT ground to a gas line. Check with a qualified electrician if you are not sure if the appliance is properly grounded. DO NOT have a fuse in the neutral or grounding circuit.

## Anti-Tip Requirements

The anti-tip boards should be fastened into position prior to moving the unit into the opening

Note: Additional mounting boards may be required if the unit does not touch he back wall of the enclosure. To prevent unit from tipping forward, it must be secured in place with a solid soffit or wood block.

## General Information

Water Supply Requirements

## $\triangle$ WARNING

To avoid serious illness or death, DO NOT use unit where water is microbiologically unsafe or of unknown quality, without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts. The contaminants or other substances removed or reduced by this water treatment system are not necessarily in your water.

## Use only $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ copper tubing for water line. DO NOT install copper tubing in area

 where temperatures drop below $35^{\circ} \mathrm{F}\left(1.7^{\circ} \mathrm{C}\right)$. Before attaching copper tubing to the unit, flush at least 2 quarts ( 1.9 L ) of water through the copper tubing and into a bucket to remov any particles in the water line.- Viking Range Corporation is not responsible for property damage due to improper installation or water connection.
- Connect $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ flexible copper tubing to household plumbing in compliance with local codes and ordinances
- Length of copper tubing must reach from wate supply connection to the unit connection with additional length to facilitate moving the unit ut helosure for cleanig or servee. Tubing should be soft instead of rigid and ends should e free of burrs.
- Copper tubing route must be above $35^{\circ} \mathrm{F}$ $\left(1.7^{\circ} \mathrm{C}\right.$ ) to prevent water line from freezing.
- DO NOT use plastic water lines from the household plumbing to the water inlet valv connection on the refrigeration unit.
-DO NOT use the self-piercing feature of a saddle valve. The hole made by the piercing ance is too small for the water flow rate required by the ice maker.
- If saddle valve is not used, place a separate shut-off valve in an easily accessible location between water supply and the unit DO NOT install shut-off valve behind the unit.
- The installation of Viking units with a reverse osmosis system is acceptable as long as the water pressure remains within the allowable PSI as stated below. It is important to note that with many reverse osmosis systems, the pressure level of the reverse osmosis storage area drops. This must be considered when checking the water pressure coming into the unit.

Connect a vertical or horizontal $1 / 2^{\prime \prime}(1.2 \mathrm{~cm})$ to $1-1 / 4^{\prime \prime}(3.2 \mathrm{~cm})$ COLD water line near water area.

Run water line through the floor, back, or side wall. Tubing should lay flat on floor underneath the unit. Clamp tubing to wall or floor.

- Water pressure must be greater than 20 psi and less than 120 psi on non-dispensers and greater than 35 psi and less than 120 psi on dispensers.

## General Information

Most of the unit's weight is at the top. Extra care is needed when moving the unit to prevent tipping.
-DO NOT remove protective film until unit is in operating position.
All four leveling legs must make contact with the floor to support and stabilize the full weight.

- DO NOT drop unit.
- Remove exterior shipping materials prior to moving unit into home
- Use two or more people to move and install unit. Failure to follow this instruction can result in back or other injury.
- To avoid personal injury, wear gloves when performing any installation procedure and wear eye protection when cutting metal straps.

Tip Over Hazard
Appliance is top heavy and tips easily when not completely installed. Keep doors closed until appliance is completely installed and secured per installation instructions. Use two or more people to move and install the appliance. Failure to do so can result in death or serious injury.

## Unpacking unit

. Remove top and bottom strap.

## 2. Remove top cap.

3. Cut rear of carton approximately $1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$ to $1^{\prime \prime}(2.5 \mathrm{~cm})$ from right corner with a utility knife extended $1 / 4^{\prime \prime}(0.6 \mathrm{~cm})$.
4. Remove carton and exterior packaging. Save cardboard shipping material to protect floor surface when installing unit. Remove anti-tip board, kickplate and door trim pieces (DF models) from rear of unit.

Moving Unit

Remove shipping brackets from skid by removing four bolts (two on each side) with a $1 / 2^{\prime \prime}$ deep-well socket wench and a pair of pliers. Note: Tilting unit is not required to remove shipping brackets.

Place unit in front of cutout.

Using an $8^{\prime \prime}$ magnetic nut drive

Remove grille assembly.

Slip cart between unit and skid. Remove unit from skid. Note: Use excess packaging to protect decorative trim also, verify that leveling legs are up ( 0 " adjustment).

If needed, depending on cabinet and depth
attach second $2 \times 4$ to first $2 \times 4$.

Plug in power cord to verify operation.
Note: Make sure power switch and
showroom switch are in the "On" position

Place unit within $3^{\prime \prime}$ of being flush with cabinets. Note: To avoid cabinet damage, place cardboard
between cabinets and unit. When moving unit,

Pull supply tubing forward under unit.
Note: DO NOT use plastic water lines.

Connect supply tube to water valve using 1/2" wrench. Note: DO NOT overtighten.

Carefully move unit until semi flush with cabinet (depending on unit).

Flush water line by running two quarts of water into a bucket. Turn water off

Water Filter Installation (side-by-Side with Dispenser)

Locate water filter door. The door is located
the adjustable cold zone handle.
the adjustable cold zone handle.

Insert filter cartridge into circular opening filer housing. Rotate clockwise gently
filter stops. Close water filter door.

and pull door downward.

Flush 3 gallons through filter before use flush approximately 3 minutes). If water spurts occur Additional flushing may be required in areas with poor quality water.
NOTE: Allow $1-2$ minute delay in water dispersal to allow internal water tank to fill.

Water Filter System Specification and Performance Data Sheet

This system has been tested according to NSF/ANSI $42 / 53$ for reduction of the substances listed below. The
concentration of the indicated substances in water entering the system was reduced to a concentration of less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42/53.* ( $100 \%$ safety factors built-
in for unmetered usage for health claims only.)

| Contaminant Reduction | Average Influent | NSF Specified Challenge Concentration | $\left\lvert\, \begin{gathered} \text { Avg \% } \\ \text { Reduction } \end{gathered}\right.$ | Average Product Water Concentrtation | Max Permissible Product Water Concentration | NSF Reduction Requirements | NSF Test Report |

## Operating Specifications

$$
\begin{array}{ll}
\text { Capacity: } & \text { Certified for up to } 750 \text { gal } \\
\text { Pressure Requirement: } & 20-120 \text { psi }(1.4-8.2 \text { bar }) \\
\text { Temperature: } & 33-100^{\circ}\left(0.6-37.8^{\circ} \mathrm{C}\right)
\end{array}
$$

Certified for up to 750 gallons ( $2,838 \mathrm{~L}$ ); up to nine month

Check for compliance with the state and local laws and regulations.
Note: While the testing was performed under standard laboratory conditions, actual performance may vary. Must be installed and operated in accordance with manufacturer's recommended procedures and guidelines. Installation instructions, parts and service availability, and standard warranty are included with the product when shipped. This drinking water system must be maintained according to manufacturer's instruction, including replacement of filter cartridges.

Manufactured by: 3M Purification Inc. 400 Research Parkwa Meriden, CT 06770

Final Installation

Replace top air grille.

Replace the center grille louver.

Note: There is a 6 minute delay bef

Using an $8^{\prime \prime}$ magnetic nut driver,
replace the two $1 / 4^{\prime \prime}$ screws.

## Verify Operations

Control Panels
Bottom-Mount

Side-by-Side

1. Press "Activate Controls" pad.
2. Verify unit is not in Sabbath Mode.

If in Sabbath Mode:
A. The Sabbath Mode will disable the interior lights, display (except SAB indicator, temperature and compartment indicator) and alarm.

## To exit the Sabbath Mode:

B. Press and hold "Activate Controls" and then "Display Off" for 3 seconds. (The control will beep three times to alert the user the Sabbath Mode has been exited.)
3. Verify unit is not in Showroom Mode.

If in Showroom Mode:
A. The Showroom Mode will disable the refrigerator system but all other functions are normal. These include lights and control. (If the refrigerator is in Showroom Mode, SHOW will be lit.)
To exit Showroom Mode:
B. Press and hold "Activate Controls"; while holding, press and hold "Higher" and "Alarm Off" together. (The control will beep three times to alert the user that Showroom Mode has been exited.)
4. Press "Activate Controls" then press and hold "Lower"; while holding, press and hold "Display Off" and hold until beeps (force start compressor).
5. All models need to be set at $38^{\circ} \mathrm{F}$ and $0^{\circ} \mathrm{F}$ for the Refrigerator and Freezer respectfully - factory setting.

## Service \& Registration

Only authorized replacement parts may be used in performing service on the appliance. DO NOT repair or replace any part of the appliance unless specifically recommended in the manual. All other servicing should be referred to a qualified
technician.
Record the following information indicated below. You will need it if service is ever required. The serial number and model number for your appliance are located on the identification plate
mounted on the bottom left side of the door
opening.
