# Om

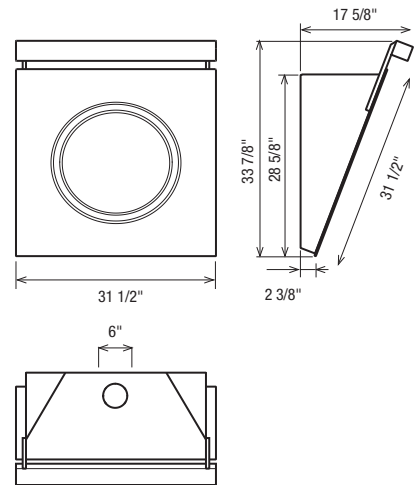

## WALL-MOUNT HOOD

The striking style of Om creates good karma with powerful performance. This artful centerpiece is gently angled from the wall; its circular air intake panel enhances the clean visual look and quietly drives Elica's innovative Perimeter Ventilation technology. Lighting and blower speed are controlled by a delicate touch to the glass, or with the cone-shaped brass remote device for operation from anywhere in the room.

MODEL#	DESCRIPTION	SHIPPING LBS.
EOMRCK11	Recirculating Kit	1.5
EOMCEK15	Chimney Extension Kit (Short)	10.4
EOMCEK16	Chimney Extension Kit (Long)	18

**Electrical:**  
AC Input: 120V - 60Hz AC Power Max.: 450W at 4.0 Amps

**Touchscreen or Remote Control Operation** – Touchscreen is nearly invisible when idle, so the unit’s visual elegance is preserved. A feather-light touch illuminates controls beneath the glass for operation of blower speed and lighting. Elica’s brass cone-shaped remote control device delivers ultimate convenience from anywhere.

**4-Speed 450 CFM Internal Blower** – Offers adequate power for everyday cooking and whisper quiet operation for entertaining.

**Maximum 5-Minute “Booster” Blower Setting** – When you need nearly instant removal of smoke or odors, switching to “Booster” provides 5 minutes of maximum ventilating power, then automatically returns to previous blower setting.

**Perimeter Ventilation** – Advanced Elica engineering draws air in through a narrowed channel around entire circumference of the thin circular intake panel. The natural physics of airflow nearly doubles suction quietly and smoothly, without increasing blower speed or energy consumption. The panel’s aerodynamic shape creates less turbulence and noise than traditional ventilation systems.

**Passive Silencer** – Another quiet Elica innovation...special sound-absorbing insulation lines the interior of Om for powerful ventilation with unsurpassed noise reduction.

**Halogen Lighting** – Four 12V, 20W bulbs provide tasteful illumination. Two light intensities allow you to set just the right mood.

Dishwasher-Safe Aluminum Mesh Filter

**Ducted or Recirculating Installations** – Standard ducted method filters the air to remove grease, then vents the air outside the home. Optional Recirculating installation will filter and purify the air, then recirculate it back into the home.
