Installation Specifications

Allow sufficient clearance between the Kimchi Refrigerator and nearby walls or furniture, and set up the Kimchi Refrigerator on a solid, even surface.

- Leave at least a $3^{15}/16$ " clearance behind the Kimchi Refrigerator. Failing to do so may result in the doors bumping into the wall or any furniture located behind the Kimchi Refrigerator when you open it, damaging them.
- The floor must be solid enough to sustain the Kimchi Refrigerator's weight after it is completely filled with kimchi.
- Installing the Kimchi Refrigerator on an inclined surface or on a step can cause it to tip over and result in injury. Set up the Kimchi Refrigerator in a location where the ambient temperature remains constant.
- Items inside the Kimchi Refrigerator may freeze and become soft if the ambient temperature is too low. The ambient temperature should be between 5° C and 43° C.
- Do not set up the Kimchi Refrigerator in an area with direct sunlight, near heating appliances, or where the ambient temperature is extremely low. Do not place the Kimchi Refrigerator on a carpet or rug.
- This will obstruct ventilation and cause the mechanical compartment to overheat, resulting in a fire hazard and decreasing the performance of the Kimchi Refrigerator.
- Keep ventilation openings in the appliance enclosure or mounting structure clear of obstructions.

Dimensions

Total Capacity: 7.6 cu. ft.

Right: 3.8 cu. ft.

- 4 Kimchi Containers

Left: 3.8 cu. ft.

- 4 Kimchi Containers
