Features & Benefits

SmartDrive™ Technology

A set of mechanical and electronic parts including a Direct Drive Motor, Floating Bowl and Motor Controller, form a mechanically simple washer that can sense and respond to each and every clothes load. Providing better clothes care and reliability with no belts, pulleys, gearboxes, clutches or brakes.

SmartTouch™ Controls

Simple SmartTouch™ controls give you a choice of 6 wash cycles and the option of turning off the High Efficiency mode. Five wash temperatures, and Quick, Soak, Bleach and Softener options lets you take control over the wash process.

22 LB Capacity

These large 22 LB capacity washers save you time and money, requiring fewer loads to wash your week's laundry. Infinite water level sensing makes these washers very efficient with both small and large loads. The big basket will easily wash bulky items like comforters and blankets.

High Efficiency with 1100rpm Spin

AquaSmart™ uses a low profile agitator to wash clothes efficiently and effectively. AquaSmart™ can also be used in the Conventional mode when you require a little more water, giving you the best of both world's. With a maximum spin speed of 1100rpm, your clothes will take less time to dry.

Durable Steel Lid

The durable steel lid is made of powder coated steel that won't chip and is resistant to chemical corrosion. Opening and closing is counter-balanced to deliver better ergonomics and hands free operation.
